The grass is greener.

* Terms and Conditions apply. While stocks last. Available until 31.3.26.

A blue Deutz-Fahr tractor is shown from a front-three-quarter view, parked in a lush green field. In the background, there are rolling hills under a clear blue sky. The tractor has a large, modern cab with multiple windows and a tall exhaust stack.

DEUTZ-FAHR

WHY IS THE GRASS GREENER?

Over 150 years in Ag

In 1864, the founder of what is now called Deutz Ag, Nicolaus Otto invented the four-stroke internal combustion engine and with Eugen Langen started the first engine factory in the world.

German engineering at its best

Engineered in Germany, Deutz-Fahr tractors bring precision, power, and reliability to the field — so you know they won't let you down.

Engines + transmissions

A key feature contributing to Deutz-Fahr's fuel efficiency is its innovative transmission systems offering smooth and precise control of power delivery.

Quiet comfort for long hours of work

Quality is the key driver for Deutz-Fahr's lineup of tractors: from the high precision, durable finish, the ergonomically-designed controls layout, to the exceptional overall comfort and visibility of the operator's station.

Technology - Push the boundaries

Our tractors give the option to choose precision farming technologies, fuel-efficient engines, and integrated GPS systems. Our cutting-edge hydraulic systems ensure superior performance and control, while ergonomic designs enhance operator comfort.

Our technicians are second to none

Our commitment to quality service and reliable parts delivery has been the foundation of our business, supporting Australian farmers for over 25 years. Providing the best service in the industry remains our top priority and is central to the continued success of our organisation.

A MESSAGE FROM DEUTZ- FAHR'S GM

2026 has arrived and there's never been a better time to get into a new Deutz-Fahr tractor.

In this catalogue we've got all the latest offers and promotions across the entire range, with incredible savings on normal pricing and a low 0.99% finance rate – but hurry because limited stock and factory price rises mean these deals won't last long.

Proudly distributed by PFG Australia, we've been in Australia for over 25 years and have sold over 10,000 Deutz-Fahr tractors to farmers and growers all over the country. Our reputation is built on providing high quality, reliable products at unbeatable value and the lowest overall cost of ownership in the industry.

We offer:

1. European quality at an affordable price
2. Ultra efficient Deutz engines that are proven to outperform other leading brands
3. High levels of features and specifications as standard equipment
4. Strong resale value to protect your investment
5. A comprehensive network of highly experienced dealers you can trust to keep your tractor performing at its best

If you've never tried a Deutz-Fahr tractor or haven't seen our latest models, talk to us today - we'd love to offer you a free, no obligation demonstration.

Jarrod Maskell
General Manager
Deutz-Fahr Australia

PFG AUSTRALIA - A PARTNERSHIP IN YOUR FUTURE

Distribution hubs in Victoria and Queensland support our growing dealer network throughout Australia. Melbourne distribution centre above, and the Yatala distribution centre below.

PFG Australia is the nation's largest independent supplier of agricultural machinery and equipment, led by a team that is fully committed to our customers, dealers and suppliers.

Substantial in footprint yet agile in operation, we source, distribute, service and support a range of products from some of the world's leading manufacturers.

We are here for customers – agricultural, municipal and residential.

- The story of PFG Australia is one of consistent enterprise and expansion
- Our exclusive distribution rights have grown from two brands in 2000 to 15 brands in 2023
- A modest dealer presence on the eastern seaboard has now expanded to a truly national network, encompassing 300+ dealers across Australia
- From small premises in Melbourne's west, PFG Australia now owns a multi-purpose corporate, assembly and training base in Derrimut, VIC and a purpose built assembly and distribution hub in Yatala, Queensland.
- Our distribution footprint has grown from two tractor brands to encompass many of the world's leading machinery, viticulture, parts, feed mixer, mower and loader manufacturers.

'Our history has been enriched by a culture that can only be nurtured by a family owned business. It is this unique position and our passion in delivering the most engaged customer experience in the Australian agriculture industries that defines our history and shapes our future.'

DEUTZ-FAHR 8 SERIES LAUNCH - NEW AGE OF TITANS

The introduction of the new Deutz-Fahr 8 Series marks one of the most significant milestones for the German brand since the debut of the Agrottron range three decades ago. Just as the Agrottron revolutionised tractor design in 1995, the 8 Series represents a complete ground-up redesign, engineered to meet the highest expectations of contractors and large-scale farming operations. After years of development, Deutz-Fahr has delivered a range that sets new benchmarks in performance, comfort, and digital connectivity.

Unveiled at Agritechnica 2025, the 8 Series launches as a two-model lineup: the 8310 TTV (313 hp) and 8340 TTV (340 hp). Both share a common frame size and weigh just under twelve tonnes, offering exceptional stability and versatility. With a 3,057 mm wheelbase and impressive power reserves, these tractors are built to handle a wide variety of draft and PTO tasks with ease.

At the heart of the 8 Series lies the FPT N67 engine, delivering up to 340 hp and 1,398 Nm of torque in the 8340 TTV. Advanced features such as an eVGT turbocharger ensure instant response, while the EGR-free architecture combined with HI-eSCR2 after-treatment optimises fuel efficiency and emissions. Fully HVO-compatible and boasting extended service intervals of up to 1,000 hours, this engine reduces downtime and lowers operating costs.

Power is transmitted through the ZF Terramatic TMT 32 TTV transmission, offering seamless acceleration from standstill to 60 km/h. Transport speeds are achieved at reduced engine RPM – just 1,190 rpm at 40 km/h – delivering significant fuel savings without compromising performance.

The most transformative feature is the SigmaVision cab, now 200 mm longer and wider, with 30% more space and 11% more glass for unmatched visibility. Enhanced

thermal and acoustic insulation, pneumatic suspension, and ComfortPro climate control create a quiet, ergonomic workspace. Premium seating with massage, heating, ventilation and Alcantara trim ensures operator comfort during long shifts.

Technology takes centre stage with the iControl armrest, dual HD displays, and full integration of SDF Smart Farming Solutions—including Auto Guidance, ISOBUS, XTEND, and Telematics. The system supports camera feeds and is ready for Deutz-Fahr TAGS, an award-winning assisted guidance feature that reduces operator fatigue and improves precision.

With bold styling, advanced lighting, and cutting-edge digital tools, the new Deutz-Fahr 8 Series is more than a tractor – it's a future-ready powerhouse designed to transform modern farming.

Where power meets precision.

171-230HP

WARRIOR RC-SHIFT

The agricultural industry is diverse, and every business follows its own path to success—whether through size, specialisation, or a blend adapted to soil, climate, and market conditions. From large farms to small operations, contractors, and local authorities, they all share one goal: productivity.

Tractor technology must fit each operator's needs. Ploughing, sowing, cultivating, transport, harvesting, or front-loader work – every professional knows how their tractor must perform. Deutz-Fahr designed the Warrior 6 Series to meet this broad range of demands.

The pinnacle of German technology.

WARRIOR TTV

Success today means doing every job efficiently with minimal resources. To help businesses cut costs and maximise productivity, Deutz-Fahr created the Warrior TTV range. Three powerful models offer German quality, precision and reliability, paired with advanced, cost-effective technology.

Built in Lauingen, Germany, the Warrior Series features the MaxiVision 2 cab, intuitive controls, a redesigned armrest, precision-farming systems, and highly efficient engine and transmission technology. Innovative axles, strong brakes, and powerful front and rear hydraulics ensure comfort, safety and high performance.

The result: a versatile, efficient tractor ideal for professional contractors and agricultural businesses – on the road and in the field.

PARTS & SERVICE

Quality nationwide parts and service.

With a Deutz-Fahr tractor you are not only investing in over 150 years of manufacturing excellence, you are also getting the support of a highly professional global parts and service organisation.

At the local level, PFG plays a key role in the Deutz-Fahr service promise, and we have a proud history of providing strong after-sales support. We're locals in communities throughout Australia, and we're 100% family owned.

Our network of dealers are backed up with extensive training, both online and in-person with factory specialists. We can ensure that your tractor is always ready for operation, day after day.

This service commitment is not just confined to a team of very capable people and some smart technology. We also have an extensive range of parts held at our local warehouses and an efficient delivery service Australia-wide.

DEUTZ-FAHR. AUSTRALIAN PROVEN.

RELIABILITY

We set new standards in production quality.

High-tech made in Germany.

German engineering without compromise.

Deutz-Fahr tractors are built in Lauingen, the most advanced tractor manufacturing facility in Europe. This is where precision engineering, automated production, and decades of technical know-how come together. Every tractor is crafted to deliver maximum reliability, strength, and performance in real-world conditions.

From high-horsepower models to specialist configurations, each machine is engineered to handle the demanding mix of soils, climates and applications farmers face today. Premium European

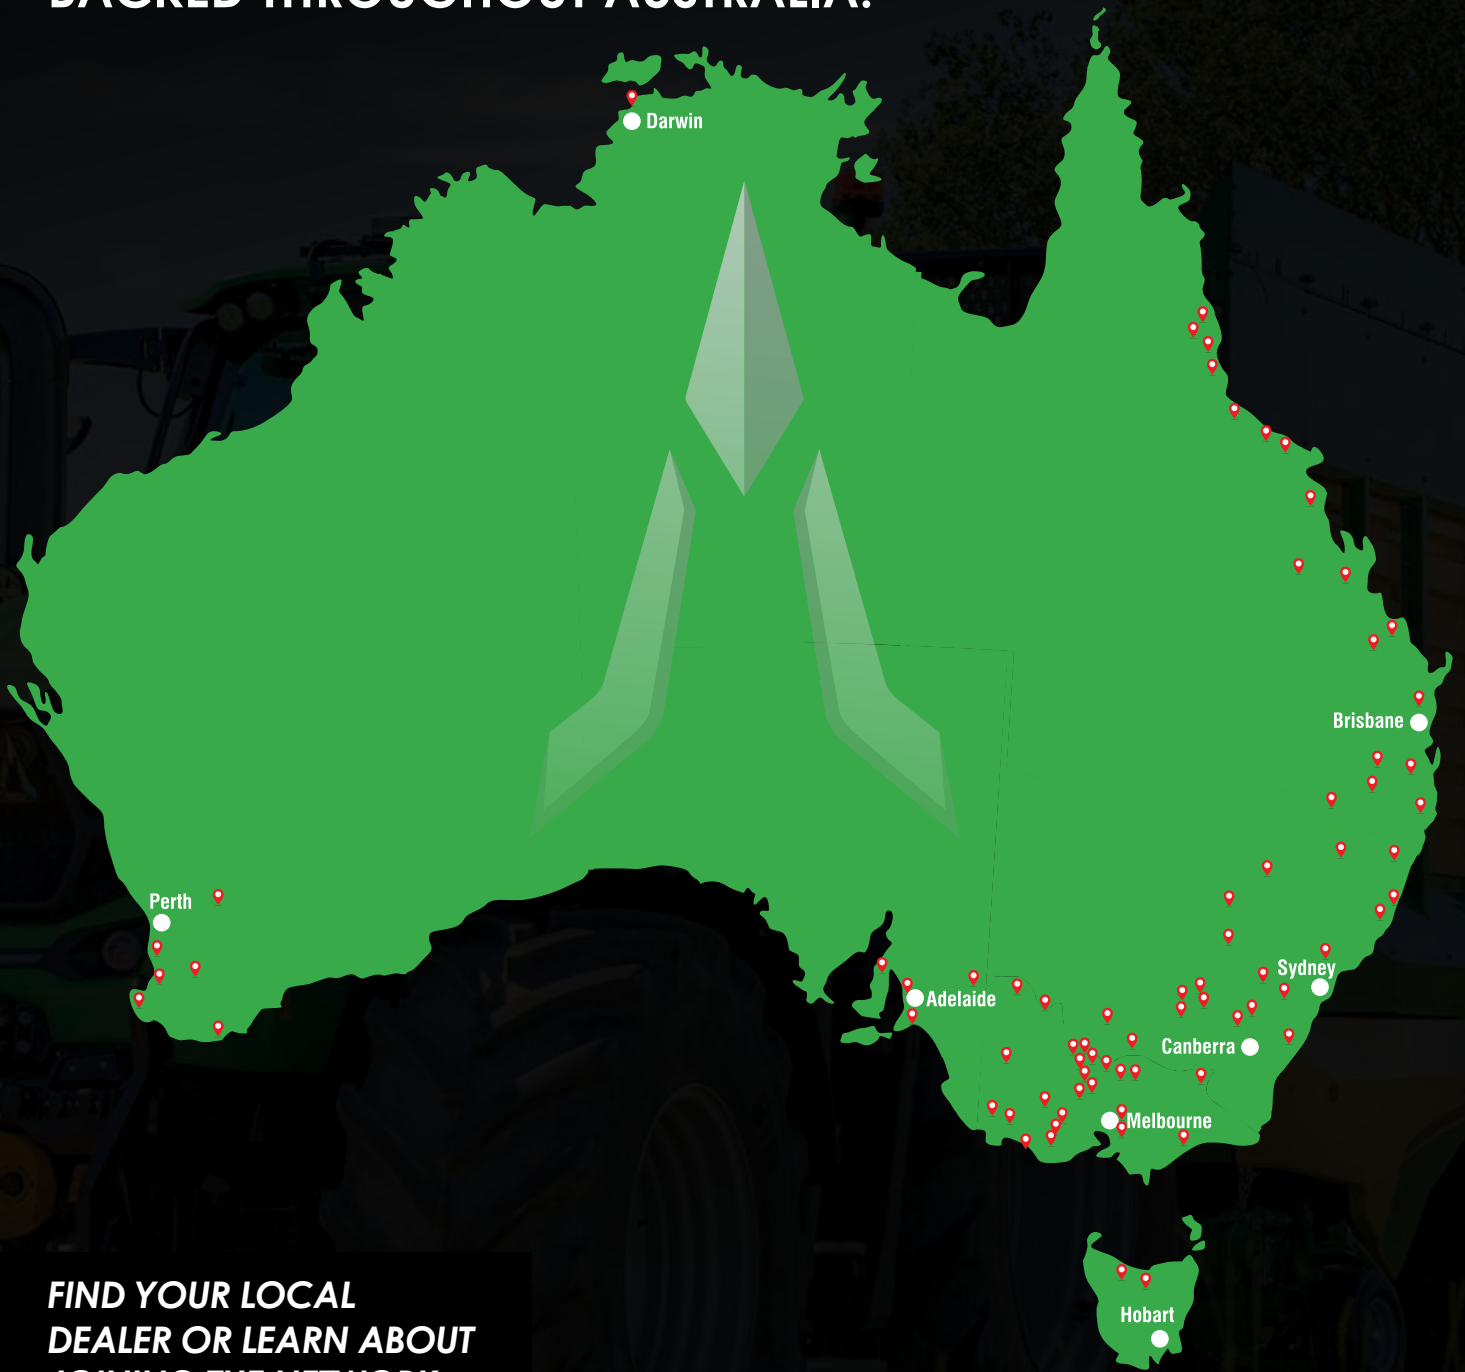

components, rigorous testing, and laser-cut accuracy form the backbone of every build.

These tractors are designed to work harder for longer. With efficient powertrains, intuitive technology, and purpose-built systems, they give operators confidence day after day, acre after acre.

Deutz-Fahr backs that with fast, expert support and a strong global parts network, ensuring downtime is kept to a minimum and productivity stays high.
